

# Breedlove

## The Organic Collection

SUSTAINABLY HARVESTED ALL SOLID WOODS FOR SUPERIOR SOUND & REVOLUTIONARY VALUE.

• No Plywood – Sustainable Clear-Cut Free Solid Tonewoods •

# HOW BREEDLOVE IS SETTING A NEW STANDARD FOR GUITAR DESIGN, SOUND & ACCESSIBILITY

---

---

## THE NATURAL PATH TO UNINHIBITED SOLID SOUND

- *Thin tops and finishes, and less than half the glue, reduces weight for more sound and sustained overtones.*
- *No synthetic materials like Richlite, resin impregnated softwoods or glue heavy plywoods which diminish tone. Only all solid tonewoods, sustainably harvested from naturally grown forests.*
- *Crafted with the world's proven superior tonewoods: individually harvested and FSC Certified European spruce, FSC Certified African mahogany and African ebony from the Republic of Congo, and myrtlewood from Oregon's Pacific Coast. Nothing is clear-cut.*
- *Torrefied European spruce soundboards for rich aged tone. Additionally, torrefaction minimizes the impact of shifting humidity and temperature changes on the guitar tops.*
- *New Breedlove Natural-Sound electronics with volume and tone controls, and easy battery replacement uses 2 x AAA batteries.*
- *Available in all four of Breedlove's revolutionary body shapes: Concerto, Concert, Concertina and Companion.*

## THE TOP 3 SOUND AND TONE BENEFITS

***Real Tonewood Sounds Superior:*** No Richlite or resin impregnated softwoods, no glue-heavy plywoods: just real tonewoods, real tone.

***Lighter Guitars Sound and Feel Better:*** Optimized revolutionary body shapes with thinner tops and finish, less than half the glue and tops optimized for minimum thinness all contribute to the best sounding guitars on the market at each price point.

***Advanced-Authenticity Sound:*** Our torrefaction process advances the natural tonal aging process for instruments that sound richer and more dynamic than standard new guitars.

## THE TOP 3 PERFORMING BENEFITS

***Dependable, Convenient and Reliable Electronics:*** Changing batteries is simpler and faster – 2 x AAA batteries accessible next to the end pin jack. The adjustable volume and tone controls are right where you need them – at your fingertips mounted in the sound hole.

***More Durable + Less Maintenance:*** Solid wood guitars are traditionally more susceptible to humidity and temperature changes. Our torrefaction process minimizes the effects of shifting conditions, delivering the highly desired solid tonewood sound with less maintenance.

***Playing an Organic Series Makes the World a Better Place:*** These are the only guitars at this price point built without wood from clear-cut forests. Play a lifetime of guilt-free music while helping to protect the world's forests.

# *The Signature Series*

*The World's Highest Value, Astoundingly Affordable, All-Purpose  
& Superior Sounding Acoustic – Electric Guitars*

# BREEDLOVE ORGANIC SIGNATURE SERIES

## TORREFIED EUROPEAN SPRUCE - AFRICAN MAHOGANY

*The World's Highest Value, Astoundingly Affordable, All-Purpose

# *The Wildwood Series*

*Classic All Solid African Mahogany Guitars  
With Warm, Bold Sound*

## **BREEDLOVE ORGANIC WILDWOOD SERIES**

### **AFRICAN MAHOGANY - AFRICAN MAHOGANY**

#### ***Classic All African Mahogany Guitars With Warm, Bold Sound***

*Based on FSC Certified African Mahogany from the Congo River Basin, all solid Organic Wildwood cutaway acoustic-electric guitars deliver an abundance of warm, rich tone. The natural satin finish and tortoise binding accent the grain of the mahogany, which is native to the world's second largest rainforest.*

<i>Performer Concert Bourbon CE Torrefied European-African Mahogany</i>	<i>\$932</i>	<i>\$699</i>
<i>Performer Concertina Bourbon CE Torrefied European-African Mahogany</i>	<i>\$932</i>	<i>\$699</i>

# The Artista Series

*Custom Designed, Exotic Oregon Myrtlewood, Luxury Models*

## **BREEDLOVE ORGANIC ARTISTA SERIES**

### **CUSTOM DESIGNED, EXOTIC OREGON MYRTLEWOOD, LUXURY MODELS**

***Built with the High-Energy, Balanced Tone of Myrtlewood***

*Myrtlewood grows in Oregon along a 90-mile stretch of the Pacific Ocean coast. It is Breedlove's favorite tonewood for backs and sides as it delivers surprising energy and extraordinary tonal balance in addition to its highly varied color patterns accentuated by the thin Natural Shadow Burst finish. To further boost the High-Energy sound we have chosen a Hard Rock maple neck, which is denser than mahogany, and an African ebony fretboard and bridge. Of course, the top is torrefied European spruce for the rich aged sound of a guitar built decades ago. Nothing had been spared including brass inlays, gold frets and tuners, Breedlove Natural-Sound Electronics.*

<b><i>Artista Series Models</i></b>	<b><i>MSRP</i></b>	<b><i>MAP</i></b>
